work, and were extremely fortunate in securing the services of Engineer Bullock who is by the contractors and bonding houses of the country acknowledged to be the first in his profession in the United States. There has been no haphazard business anywhere; it has been a business proposition all the way through and Tucumcari is getting the best to be had all the time. The people are satisfied and everybody anxious to see the work begin that is to make Tucumcari the cleanest, healthiest and most progressive town in the territory of New Mexico.

The only thing that remains to be done now before the work begins is in the hands of Attorney Reed Holloman, the city Attorney, who has in charge of the legal phase of the whole matter. When the bonds are approved by the bonding houses the money will be placed in a local bank and ready for use. Mr. Holloman had charge of the legal work of the school bonds here and handled them successfully, gaining a point of law over the attorneys for the bonding houses in Chicago and would the matter up satisfactory to everybody concerned. In the matter of the sewerage bonds he has neglected his law practice to attend to it in detail and much credit is due him for the able manner in which he has handled it.

An Auto party who was prospecting in the foothills at Hanley last Sunday made quite a discovery. They found a petrified forest and some petrified shells that are only found in deep sea water; thus proving conclusively that this entire valley was at one time an inland Sea. They secured some very fine specimens and brought them to the city. The party was composed of Dr. Thomson and wife, Mr. and Mrs. Beeth and children, with R. P. Donohoo and wife as guests.
